

### **Quick Analysis Competition “Pronocup”**

Lots of focus on classical way (excel files, forum/boards, etc...)

<http://pronocup.com/>

- URL taken and in use with similar concept
- Bad design, basic use case (will focus on Brazil 2014 also)
- No social focus (only leaderboard)
- Registration closed, so couldn't check out full flow

### **User Testing: Dhr. Martijn Moors (Sales Director BuboBox)**

- Would certainly participate in a contest like this (does this already on paper with his friends right now) ; would love to see this expand in the future to other sport verticals
- FB connect + manual friend combination
- Would prefer at least having the option to enter the data after the first matches have been played (maybe this is something we can add in a next release, or through a button in the dashboard)
- Social layer important (would certainly share

## API Examples (real-time data):

<http://goalapi.com/> (about \$300 / year for real-time API data ex. Champions League)

[http://goalapi.com/docs/xmlscores.com\\_request-format.pdf](http://goalapi.com/docs/xmlscores.com_request-format.pdf)

[http://www.footytube.com/openfooty/api\\_overview.php#](http://www.footytube.com/openfooty/api_overview.php#)

Limited for commercial use and less than 5000 requests / day

<http://openfootball.github.io/>

<http://sportbook.herokuapp.com/signin> demo/demo (similar concept, open-source)

API available!

<http://footballdb.herokuapp.com/api/v1>

## Example:

### List all rounds for an event (league+season) /event/:**key**/rounds

/event/ <b>world.confed.2013</b> /rounds	Confederations Cup 2013
/event/ <b>en.2012_13</b> /rounds	English Premier League 2012/13
/event/ <b>de.2012_13</b> /rounds	Deutsche 1. Bundesliga 2012/13
/event/ <b>euro.2012</b> /rounds	Euro 2012
/event/ <b>world.2010</b> /rounds	World Cup 2010
